"We, the American People," along with Planet Earth's billions, are in for prolonged food price inflation. Prolonged food price inflation because politicians-legislators either are unwilling or do not have tools to do anything about it. According to a media outlet economic editor. Editor makes note everyone else is paying for food price inflation because politicians-legislators are stymied or flat inept.

"In an age in which a collective mindset is expected to drown out the voice of the individual, philosophic principles have been replaced by public opinion polls."

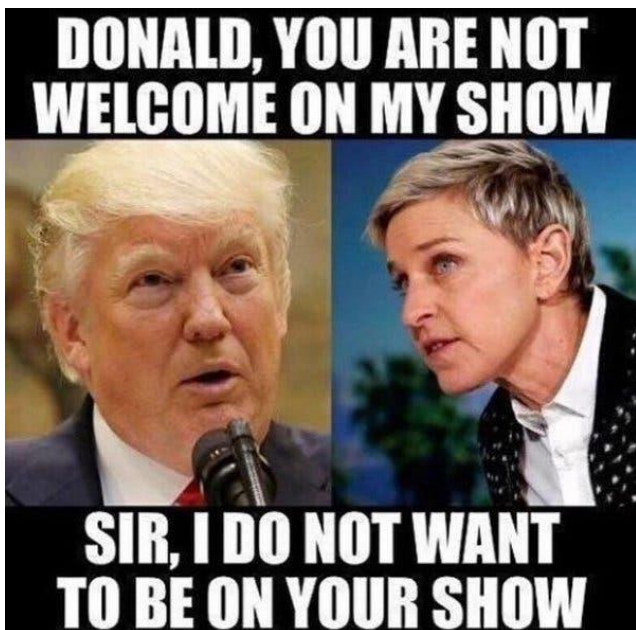

~ *Butler Shaffer*

Media Economic Editor Forecasts around a 3.2% food price inflation over coming decade due climate change. Global warming is, by economic editor's take, taking its toll on crop robustness. Meaning, crops are not capable of adjusting to keep production at levels needed to feed Earth's billions. Worsening food price inflation problem is lack of investment due lack of anticipated investment return.

"On some great and glorious day the plain folks of the land will reach their heart's desire at last and the White House will be adorned by a downright moron."

~ *H. L. Mencken*

"Our, the American People's" politicians-legislators food price inflation problem-solving impotency can not be solved by legislation. Nature will be as nature will be. Economic editor writes there are scientific efforts underway to modify crop biology to give crops a leg up on withstanding changing climate conditions. Crop farming techniques may help by limiting dustbowl-like soil disruption.

"We live in a country ruled by dangerous and foolish people; by sociopaths who are prepared to engage in the planned killing of hundreds of thousands of innocent men, women, and children, for no other purpose than to satisfy their insatiable appetites for power."

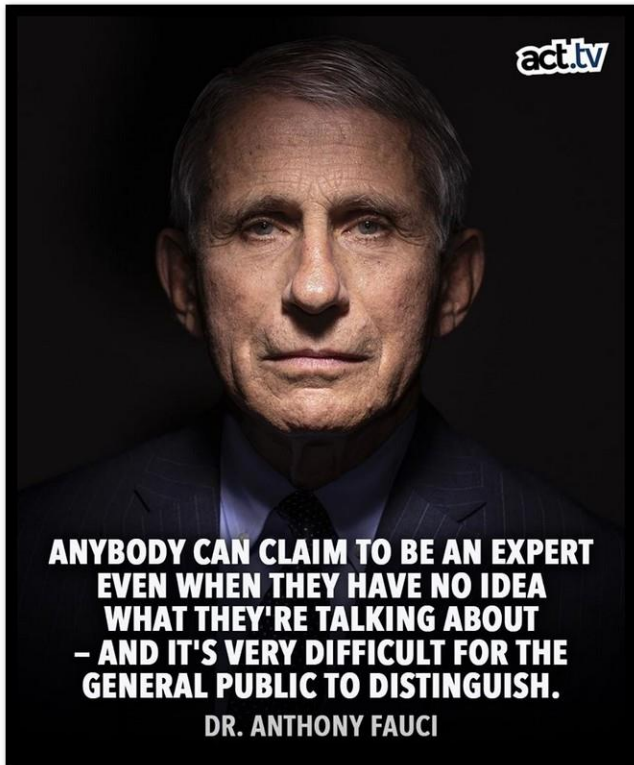

~ *Butler Shaffer*

*There Are Sure To Be Some* politicians-legislators who will try imposing dietary solutions on “Us, the American People.” We might find, for example, foods requiring high moisture consumption rates or requiring comparatively large parcels of soil use just to produce such foods are on government banning lists. Might be a tall order making people give up food stuffs on grounds of correcting climate change.

**It's Hard To Imagine** “We, the American People” do not have means to collect tariffs (trade taxes) as those tariffs (trade taxes) are now levied. Media report President-to-be Donald J. Trump proposed a new federal agency to collect tariffs (trade taxes). We would be more than justified to regard President-to-be Donald J. Trump’s push for government cuts with skepticism, given new agency initiative(s).

**There Are Numerous Internet Sites** loaded with tariff (trade tax) data. “Our, the American People’s” grasp of tariffs (trade taxes) contribution to America’s federal budget may be why there has been so much to-do over Trump tariff (trade tax) prospects. Tariff (trade tax) revenue makes up a notably small percentage of America’s federal tax revenue. Even with largest Trump tariffs (trade taxes) estimates.

**Related Congressional House Legislator**-proposed IRS reform, media coverage, if accurate and comes about, could be orders of magnitude more consequential than President-to-be Donald J. Trump's tariff (trade tax) notions. IRS reform would, in essence, do away with federal level IRS as it bears on "Us, the American People" when we spend time and property (wealth) complying with IRS edicts.

# The "I Told You So's" Mean Nothing Now!

I've mentioned many times that Climate Change is a hoax; it is not to blame for the California wildfires, state and local governments, along with bureaucrats are.

What's more dangerous than the Santa Ana Winds burning down Southern California? The elite windbags are, whose climate change lies have caused death and destruction.

I've been in the radio biz for many years. I'm not one of the popular high-salaried talking heads you see on TV or hear on other radio stations; I'm an independent talk show host and the owner of CSC Talk Radio. I broadcast from the middle of this nation; a voice literally crying out from the wilderness; Rural America.

For several decades I've been one of the voices of commonsense, warning Americans that Climate Change is a hoax. Why would people lie about such a thing? Because money, power and global governance is always their goal.

Agenda 21 is a document laying out a plan for power and the redistribution of wealth. To learn more about this, we have a few of the booklets (pamphlets) in my office explaining what Agenda 21 is truly about. (send your request to: CSC Talk Radio, PO Box 73, California, MO 65018) You can also find them online.

*"Sustainable Development or Sustainable Freedom,"* by Henry Lamb or *"A Short Course In Global Governance,"* also by Henry Lamb.

Originally, we were called conspiracy theorists, but time has proven that Agenda 21 is very real! You can search Agenda 21 online and download the very lengthy document. When you read it, you'll begin to understand.

The Green New Deal is another way to achieve the goals of Agenda 21. It uses tentacles such as, "The Endangered Species Act," and "The Nature Conservancy," to procure and control land; they frown on private property ownership. The Council on Foreign Relations is a globalist organization claiming to protect the environment. Climate Change is a green movement used not only to take away private property. (mostly in the USA) They realized by promoting their "green agenda" they could enrich themselves. "They" are the very wealthy elite (not so secret) globalist group of individuals working to establish a "New World Order." Many of our own congressional members are a part of this agenda.

When interviewing ranchers from *out west*, I was made aware of the devastation and invasion of their land. Lacking in the knowledge of how land and grazing rights work *out west*, many Americans believed the ranchers were simply being rebels and not "paying their rent." If you read my Substack article from last Friday, "**We the People Will Never Forget**," I mentioned just a few of the names of the farmers and ranchers who stood up to our government bureaucracy; they paid the price and suffered greatly.

Bureaucratic departments such as the BLM, EPA, USDA, USFWS, USFS, and the Department of Interior, manage all the lands in the United States of America, and write/require/enforce/levy/collect the rules, regulations, mandates, fines, permits, and licenses. You must dot all the "I's" and cross all the "T's" or you will go to jail. The unelected bureaucrats are making laws, and that is simply unconstitutional.

What does this have to do with the fires in California?

They are already blaming “Climate Change” for the fires and the massive loss of homes, businesses, and entire communities. The number of lives lost continues to rise. The truth is, the USFS (United States Forest Service) is to keep and maintain the forests. The forest floor, from time to time, must be maintained by removing old dead trees and by “controlled burns.” However, the state of California, with Governor Newsom, choose not to do their job. When the forests are not properly managed they become a very large tinder box, allowing fire to rage. Whether by a bolt of lightning or arson, once the fire is sparked it is most difficult to control or extinguish. When you add the Santa Ana winds you have a disaster on your hands, which is exactly what California has today!

We have talked about this situation numerous times on my radio program.

In 2018, the Camp Fire in the town of Paradise, CA scorched more than 150,000 acres and was the deadliest wildfire in California's history. Ninety-five percent of the town burned in the fire. The fire killed 85 people and destroyed almost 19,000 buildings in November 2018. The fire was active for 17 days.

It was then that President Trump met with Gavin Newsom and explained to him what needed to be done to prevent this from happening again, but the governor refused President Trump's advice. In fact, he redistributed money that was meant for the USFS and allocated it for DEI policies and toward the saving of a small *smelt* fish. Believing this “smelt fish” was endangered, Newsom decided to risk the homes and lives of Californians. This is the Endangered Species Act at work; animals, fowls, reptiles, rare bugs and fish come before human life! This is the real purpose of Agenda 21! Do you think Governor Newsom was really concerned about the Smelt?

During the Bundy verses BLM squabble, the BLM changed the grazing contract to save the desert tortoise in the Nevada desert. The contract forced ranchers to remove their cattle. Later it was discovered that there were minerals (*limestone, stone, and silica deposits*) to be mined, and the famous wealthy gold miner, Harry Reid knew of this. Our congress folks have lots of ways to enrich themselves. **Did you know:** *All desert tortoises in Nevada, whether in captivity*

*or not, are considered wildlife and therefore belong to the people of the State of Nevada. We must, at all costs, save the tortoise and the mining!*

CSC Talk Radio has talked a lot about the hoax of climate change and the true globalist goal of Agenda 21. It gives us no pleasure to be correct, nor does it reverse the current ongoing tragedy of the raging fires in California. It does, however, offer wisdom for future dealings in California.

In December of 1983 I lost my home in a fire; it was devastating. There are still days I remember the losses, or find myself searching for some item that I had pre-fire. However, when my home burned to the ground, it was just one home, not an entire community. Eventually, you will build back... but life will be different. This loss is a huge milestone in your journey here. Right now you are filled with grief and pain but rejoice, you live in the greatest nation on earth.

On that December day, I was eight months pregnant with my fifth son. Life changed drastically for us. We were full-time farmers; however, we decided to sell the farm, and my husband went into fulltime carpentry work. We moved off the farm and into town. That spring, Lee Greenwood's now famous song "God Bless the USA" hit the airwaves and shot up on the charts. President Trump has this song sung at each of his rallies... but it has a much deeper meaning for me... The very first phrase:

If tomorrow all the things were gone

I worked for all my life

And I had to start again

With just my children and my wife

I thank my lucky stars

To be living here today

'Cause the flag still stands for freedom

And they can't take that away

I pray for those in California, and yes, for our American neighbors still suffering in North Carolina. Your immediate communities are crippled but we are 50 United States and together we must stand.

***"And he who was seated on the throne said, 'Behold, I am making all things new.' Also he said, 'Write this down, for these words are trustworthy and true.'"*** Revelation 21:5

It is difficult to see the light right now, as you are still in shock, but let me assure you that you are not alone and "help is on the way."

**"We, the American People"** face a virtual auto industry recession. Claims an expert. If President-to-be Donald J. *It Is, Oddly, Only Necessary* for "Us, the American People," and for people just about anywhere, to band together if we are dissatisfied with how government is working, and throw out those who are dissatisfying us.
